Financial market players offer a wide range of career opportunities, particularly internationally. Private banking clients require a specific approach.

To meet the requirements of this clientele, the European Masters in International Private Banking develops the technical, commercial and professional skills needed in this sector. Trained experts must have integrity, reliability and credibility. The course prepares future graduates to analyse the business environment, make recommendations and implement them - skills that will help them to move into positions of high responsibility.

LEARNING OUTCOMES

- Understand European business models and their specific features
- Master the basics of economic analysis and strategic management
- Learn more about the workings of international financial markets and the foreign exchange market
- Assimilate the tools of law, taxation and international banking management
- Manage customer relations, financial assets and wealth.
